Continuous Improvement Framework
Adopted by Town Board on October 3, 2016

This framework includes the following measures:

1. Each year the Township Board will select 3± functions of the Township that:
 - a. are currently being improved or
 - b. need improvement based on input and recommendations from citizens & staff
 - c. combination of a. and b.
2. Each of these selected functions will be assigned to an individual or group. The individual or group will implement a CI plan to improve the function.
3. A report of the CI results will be provided to the citizens at the Annual Meeting. The brief quantitative report would allow citizens to see results from the previous year's Township improvements.
4. Training is key. Members of the Township Board, Planning Commission or work groups will be allowed to attend the CI training provided by the State of MN. The training is free of charge to municipalities and government workers.

Implementation

1. Board approval for the CI Framework occurred on October 3, 2016.
2. Board approval of the 3+ priorities to report at the 2017 Annual Meeting

Approved List of CI priorities for 2017 Annual Meeting

1. Township C.U.P. Maintenance
2. Township Road Maintenance
3. Township Ordinance Maintenance
